

How to draw a self portrait

Lots of artists draw or paint a picture of themselves.

Vincent Van
Gogh

Pablo Picasso

Andy Warhol

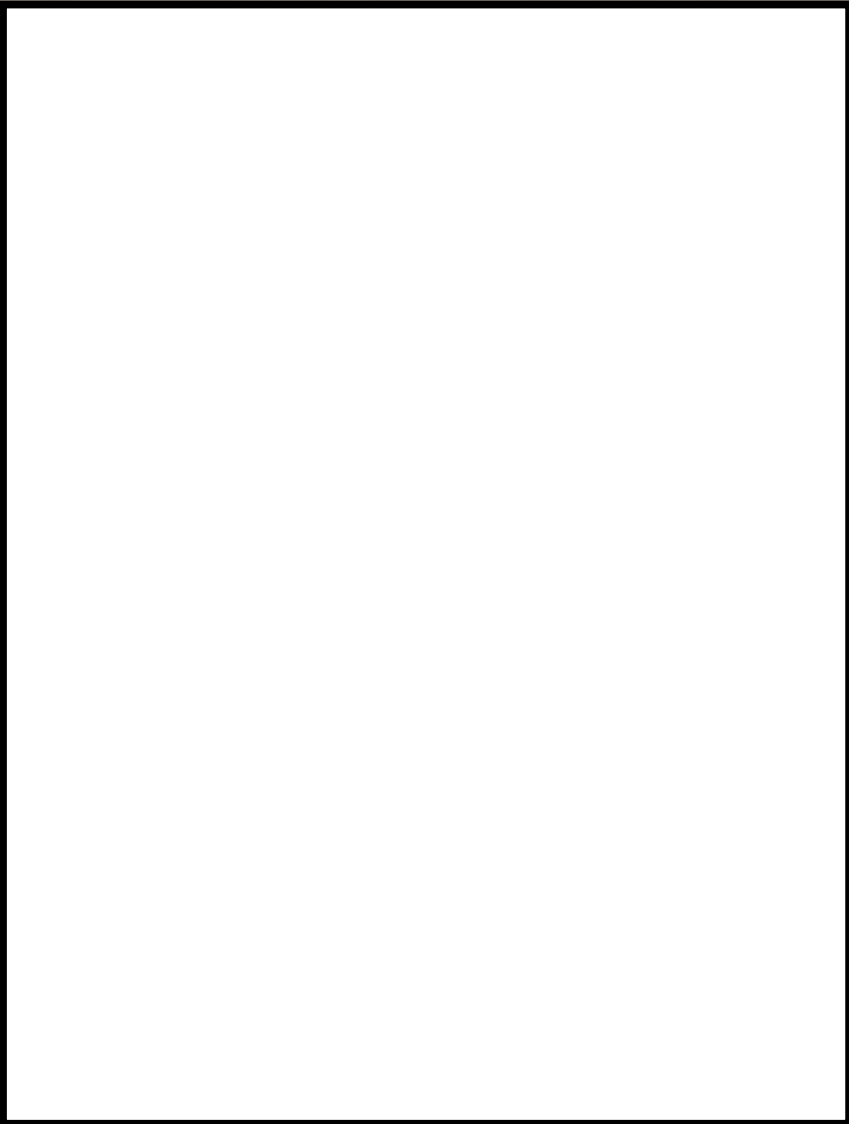

This is called a self portrait.

To draw a self portrait you need a mirror.

Look at your face. What colour are you eyes? What colour is your hair? Do you wear glasses?

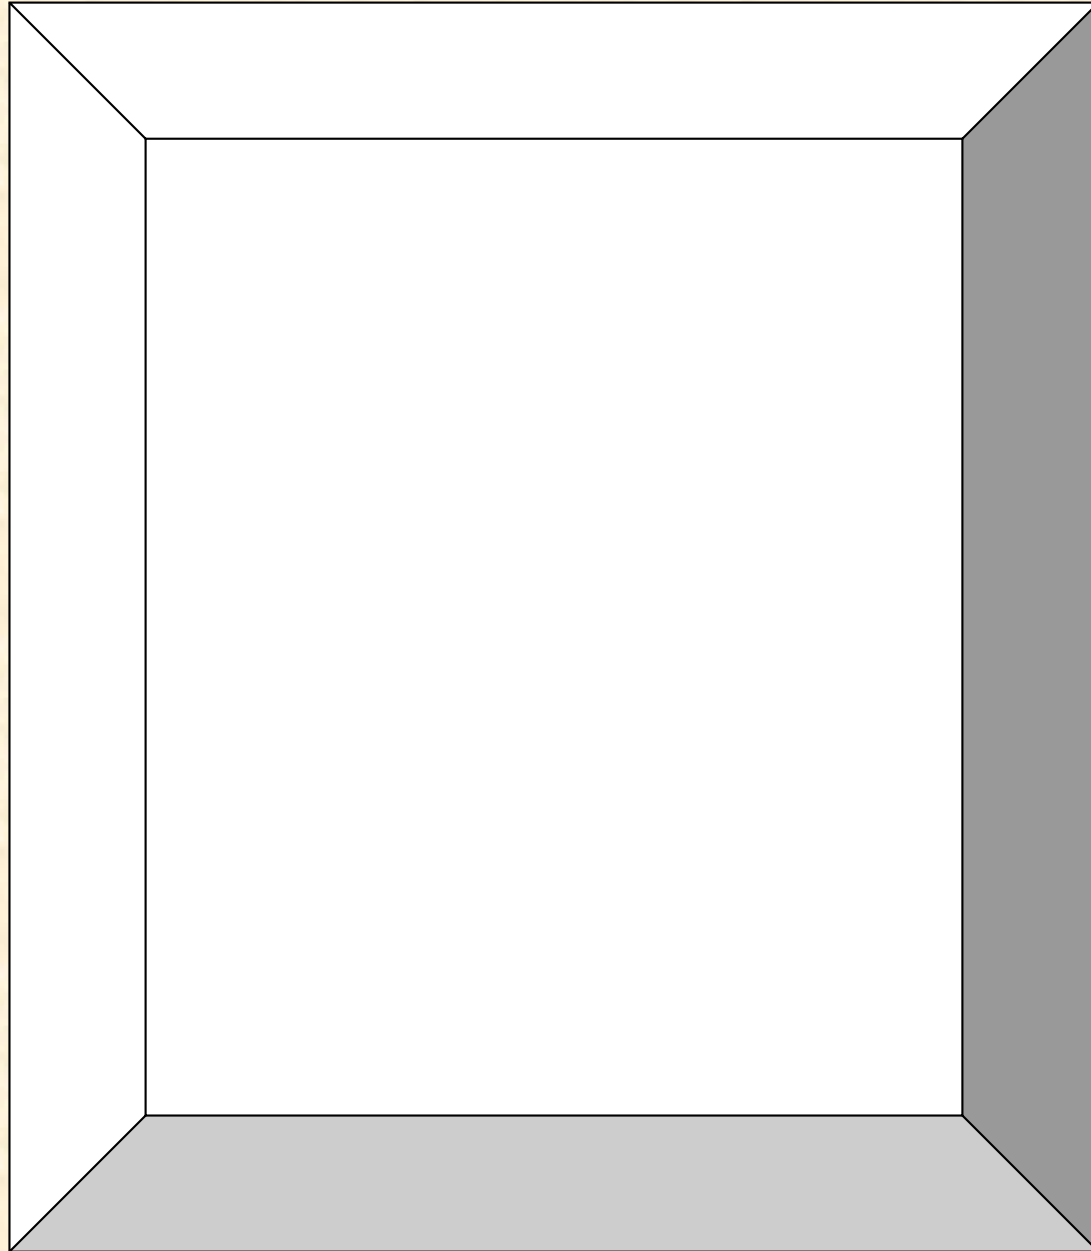

These are the things you will need to remember for your picture.

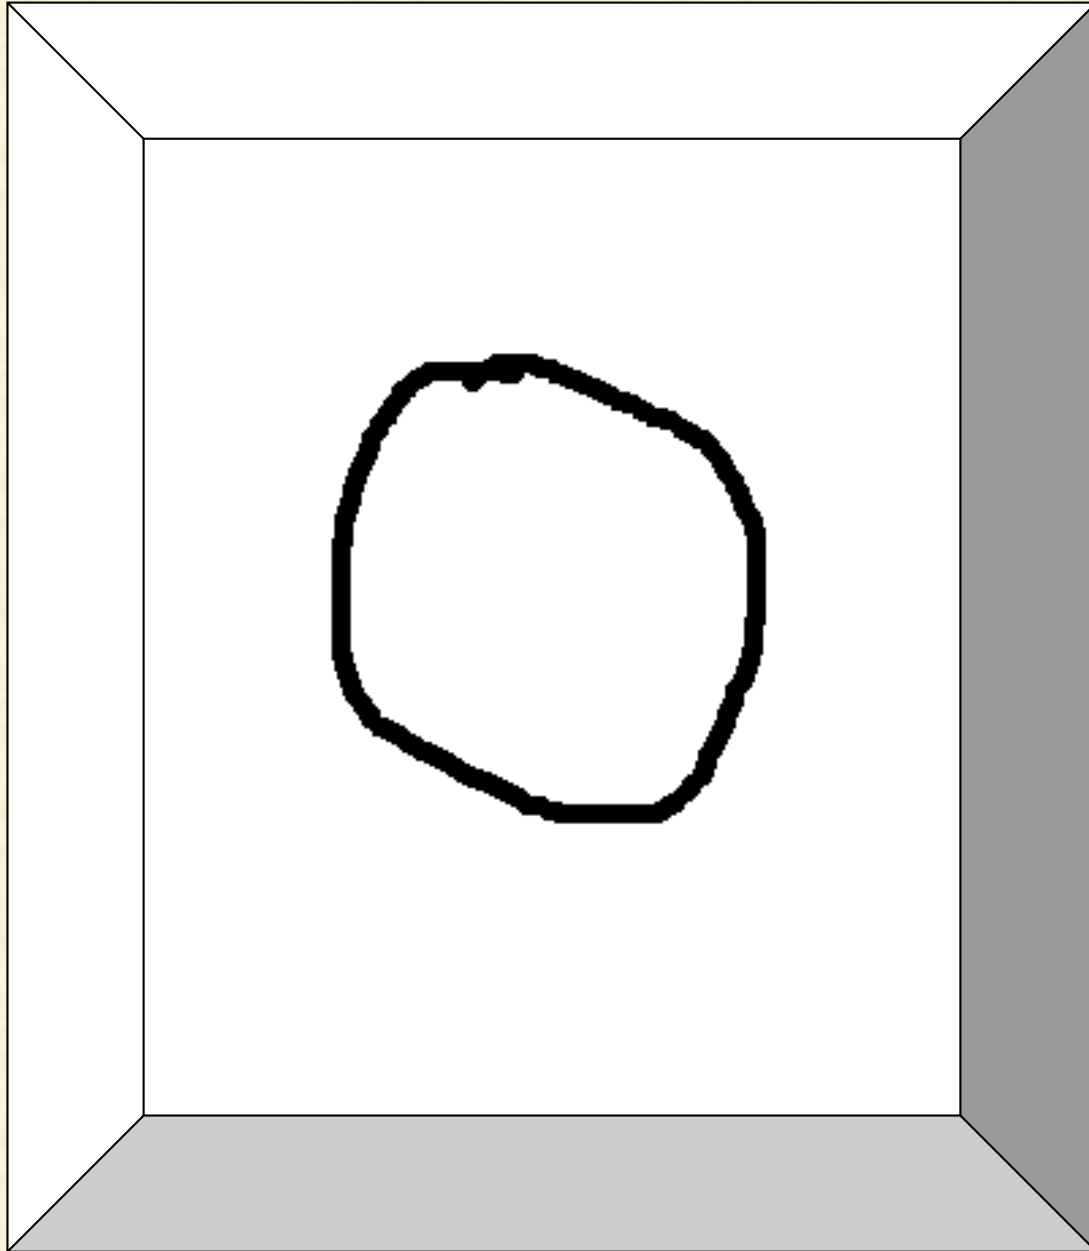

Make sure you have
your piece of paper
this way round.

This is the correct
way to draw a
portrait.

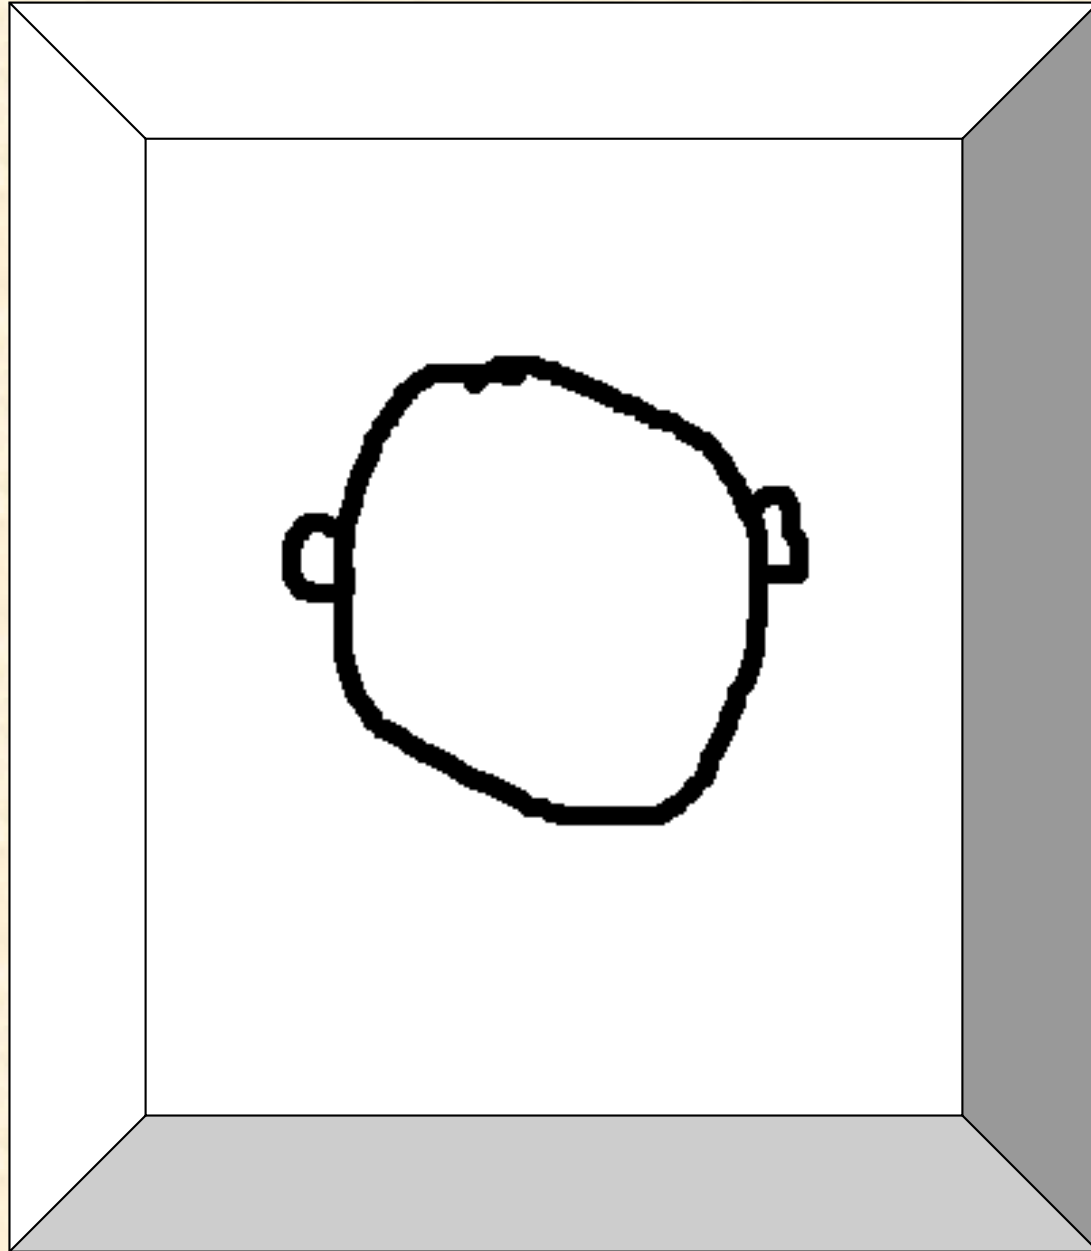

Now it's time to start to draw or paint.

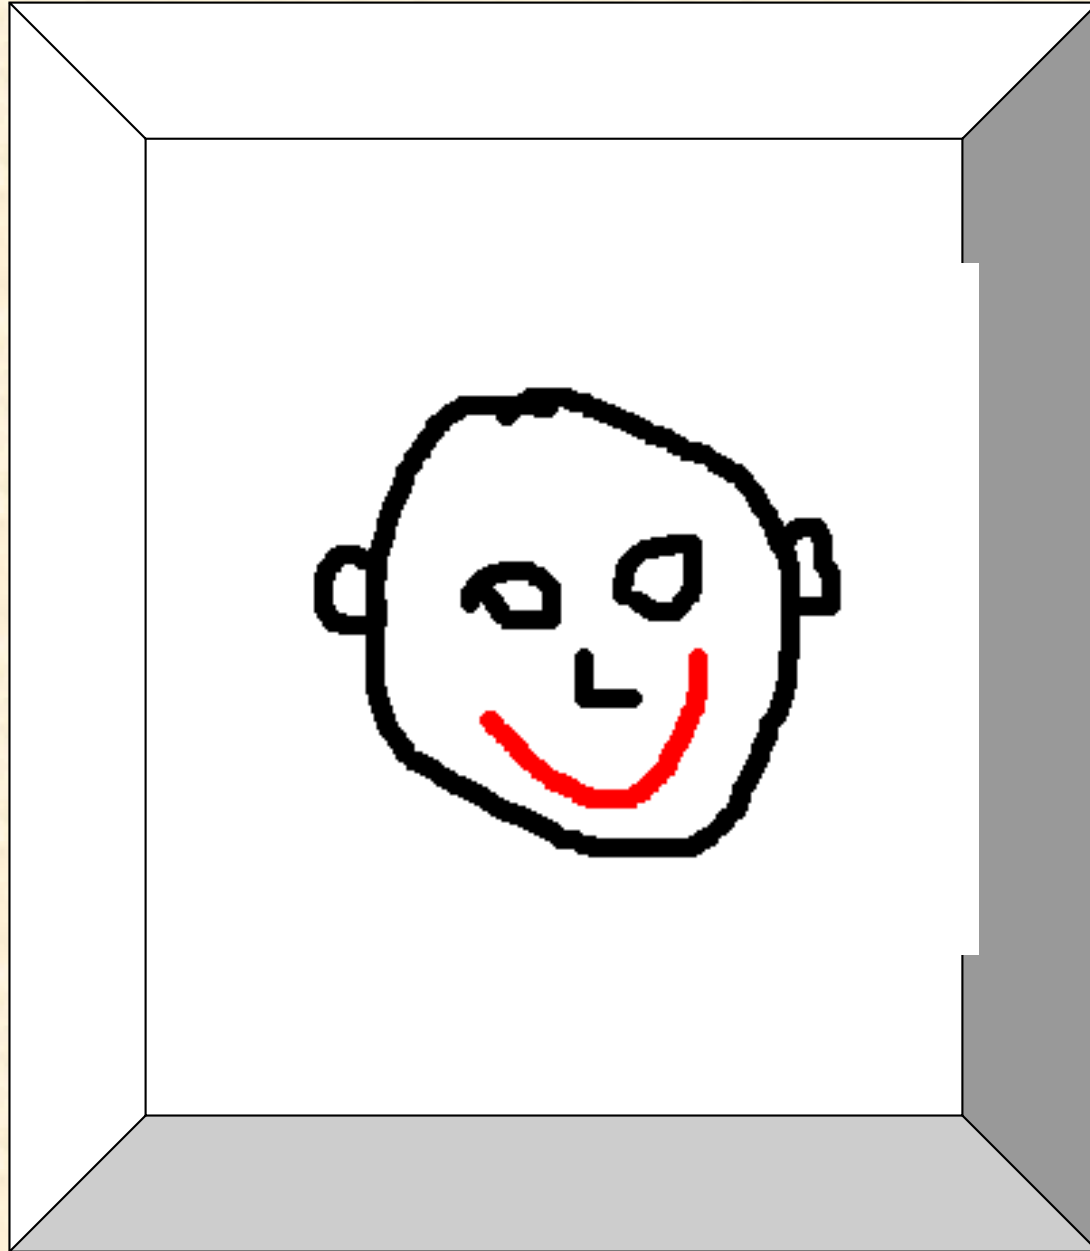

Start with the shape of your face.

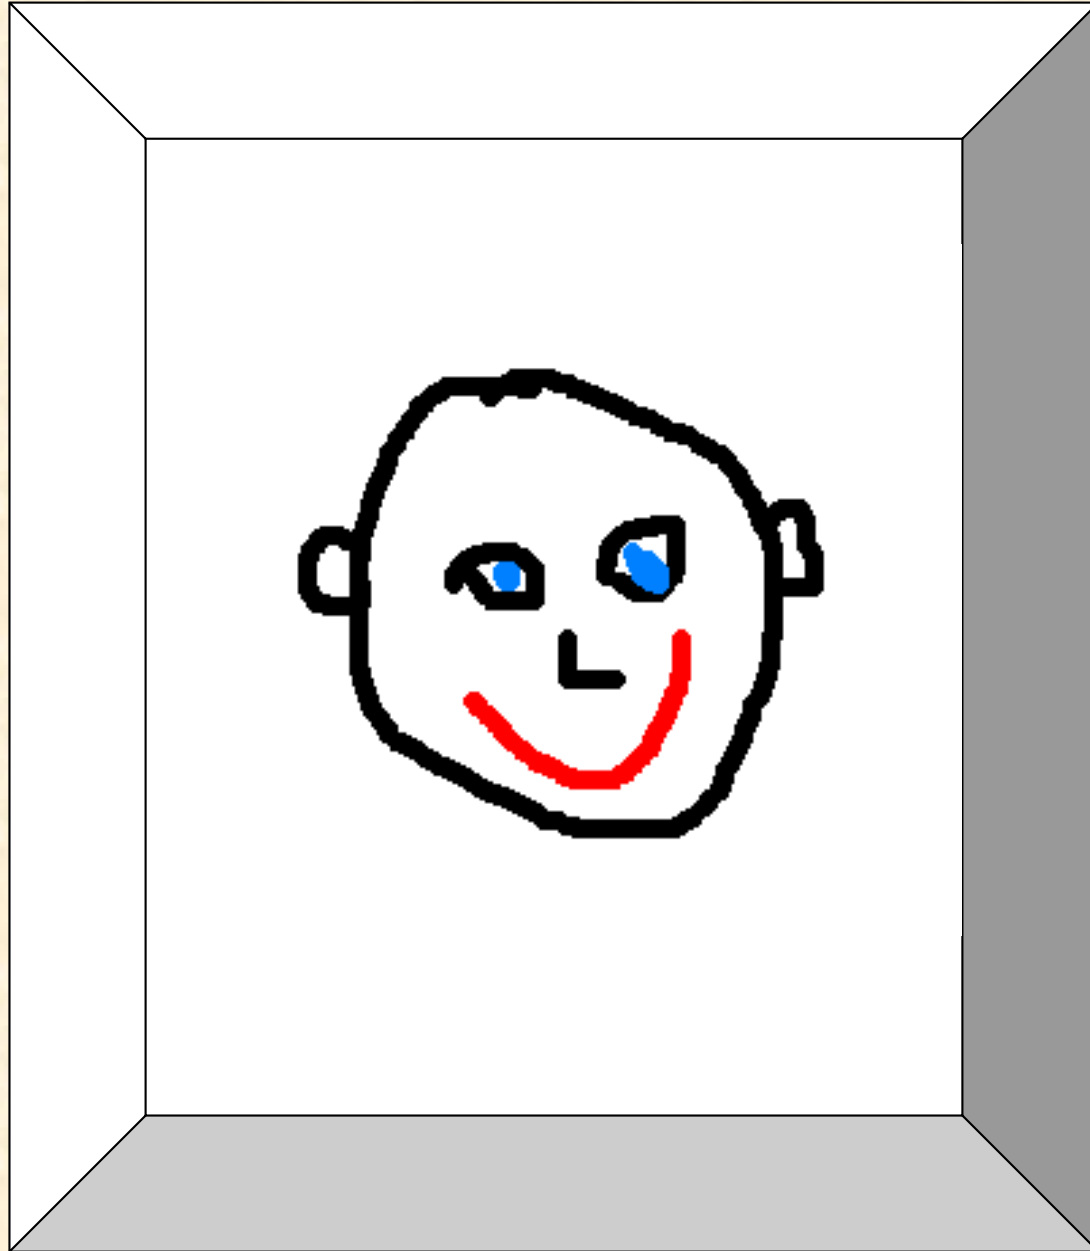

Don't forget to put on ears!

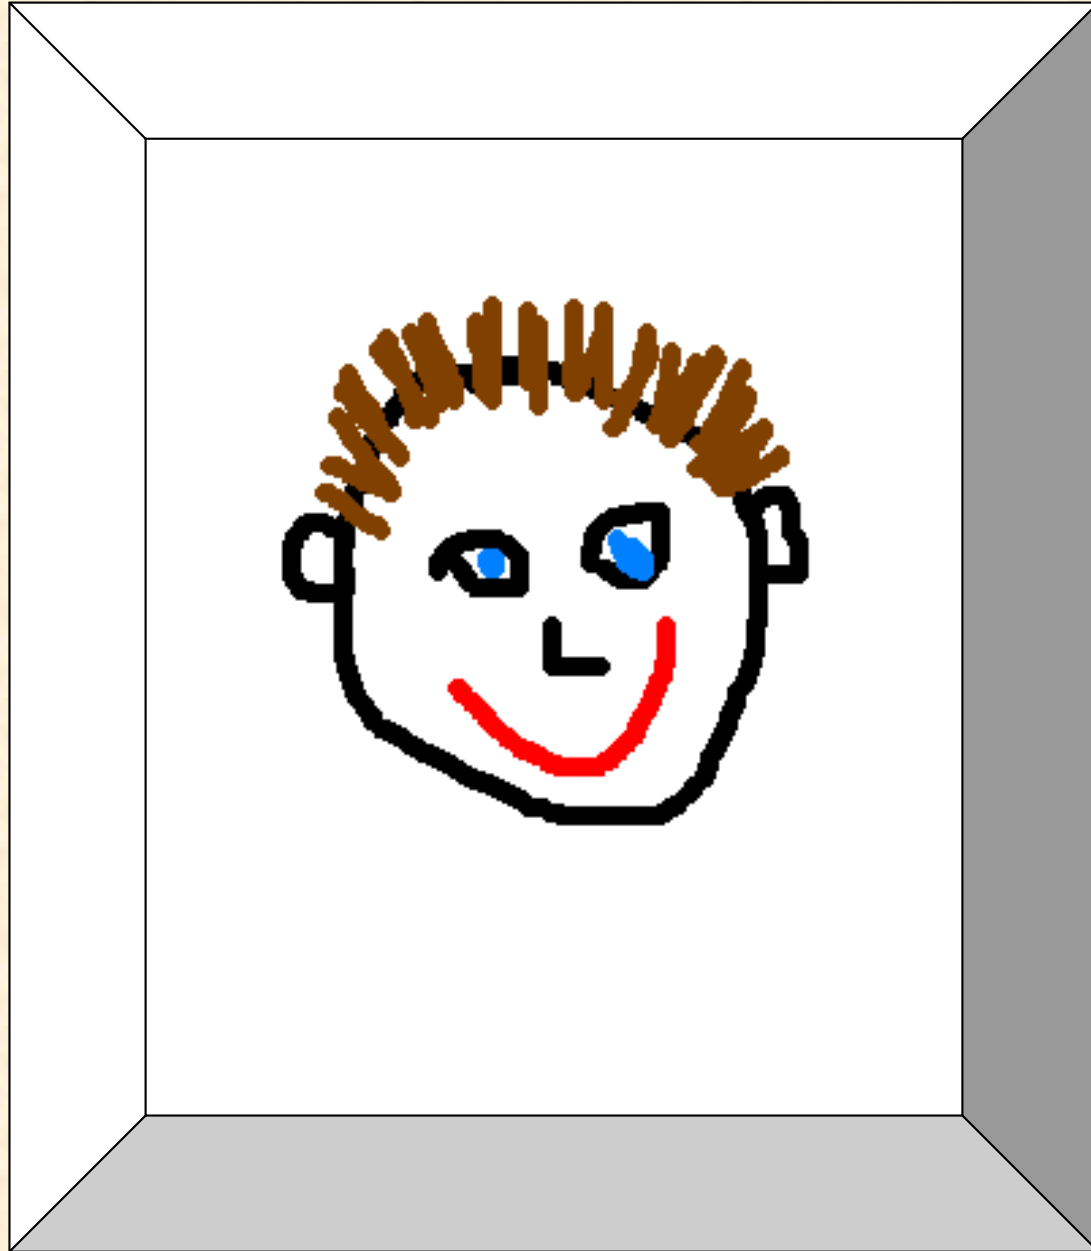

Now add your eyes, nose and mouth.

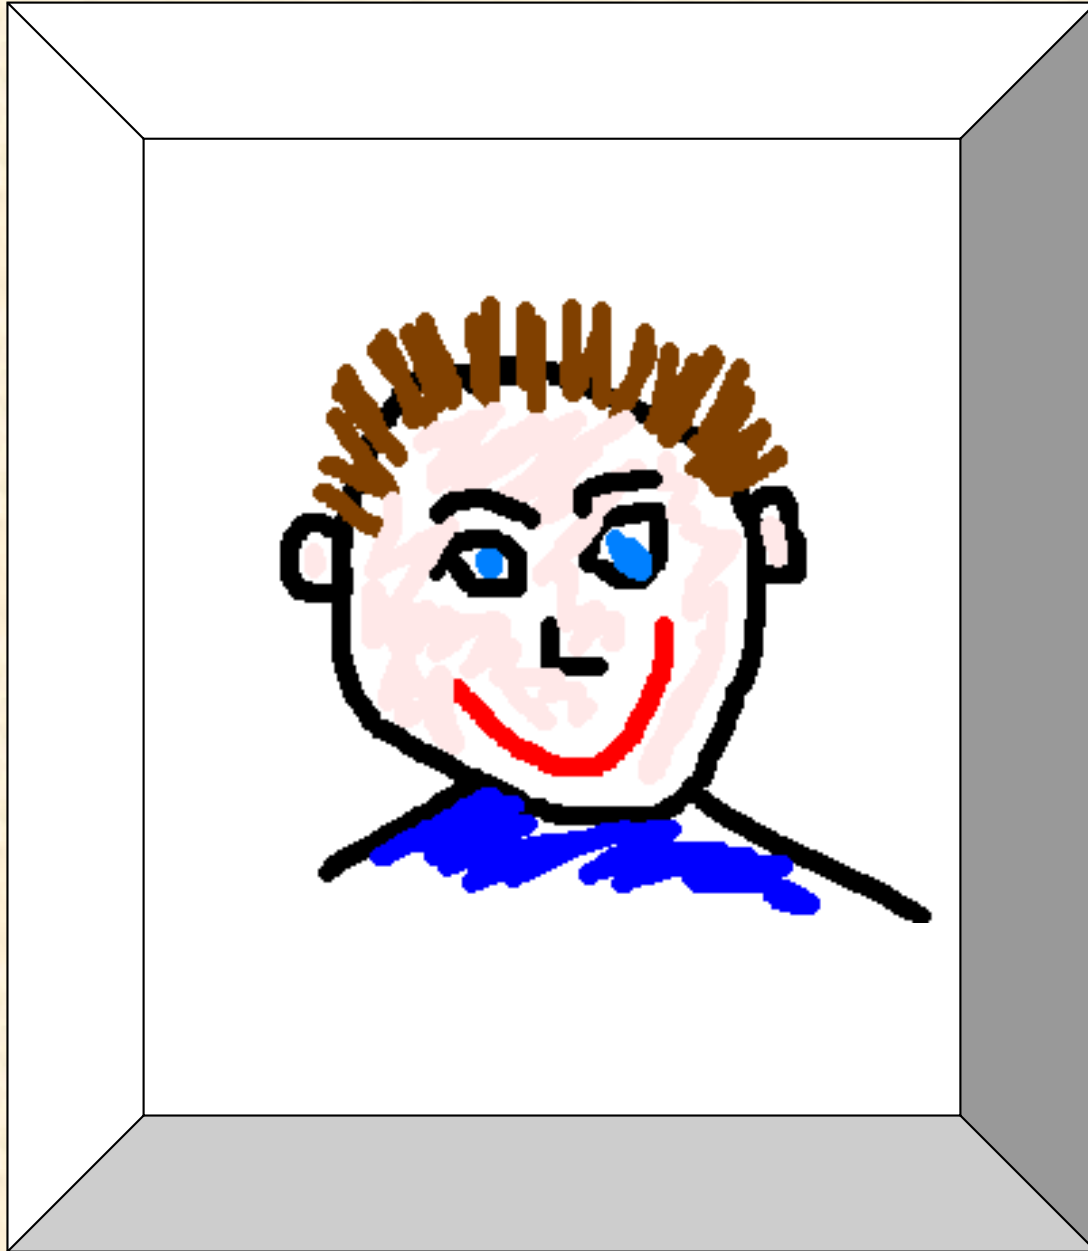

Make sure your eyes are the right colour!

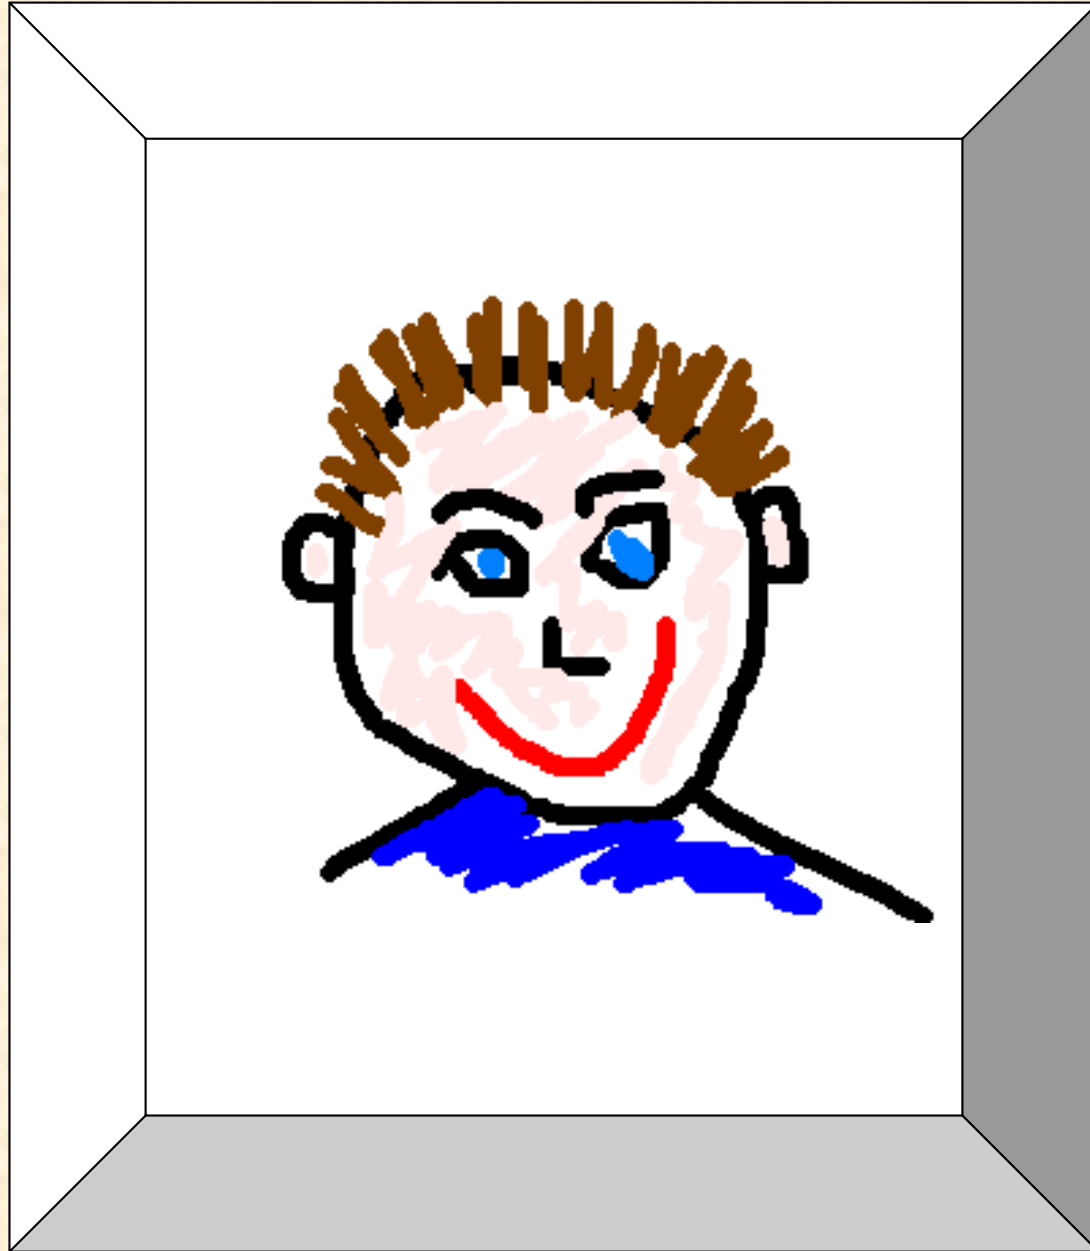

Now add your hair. Make sure it's the right colour!

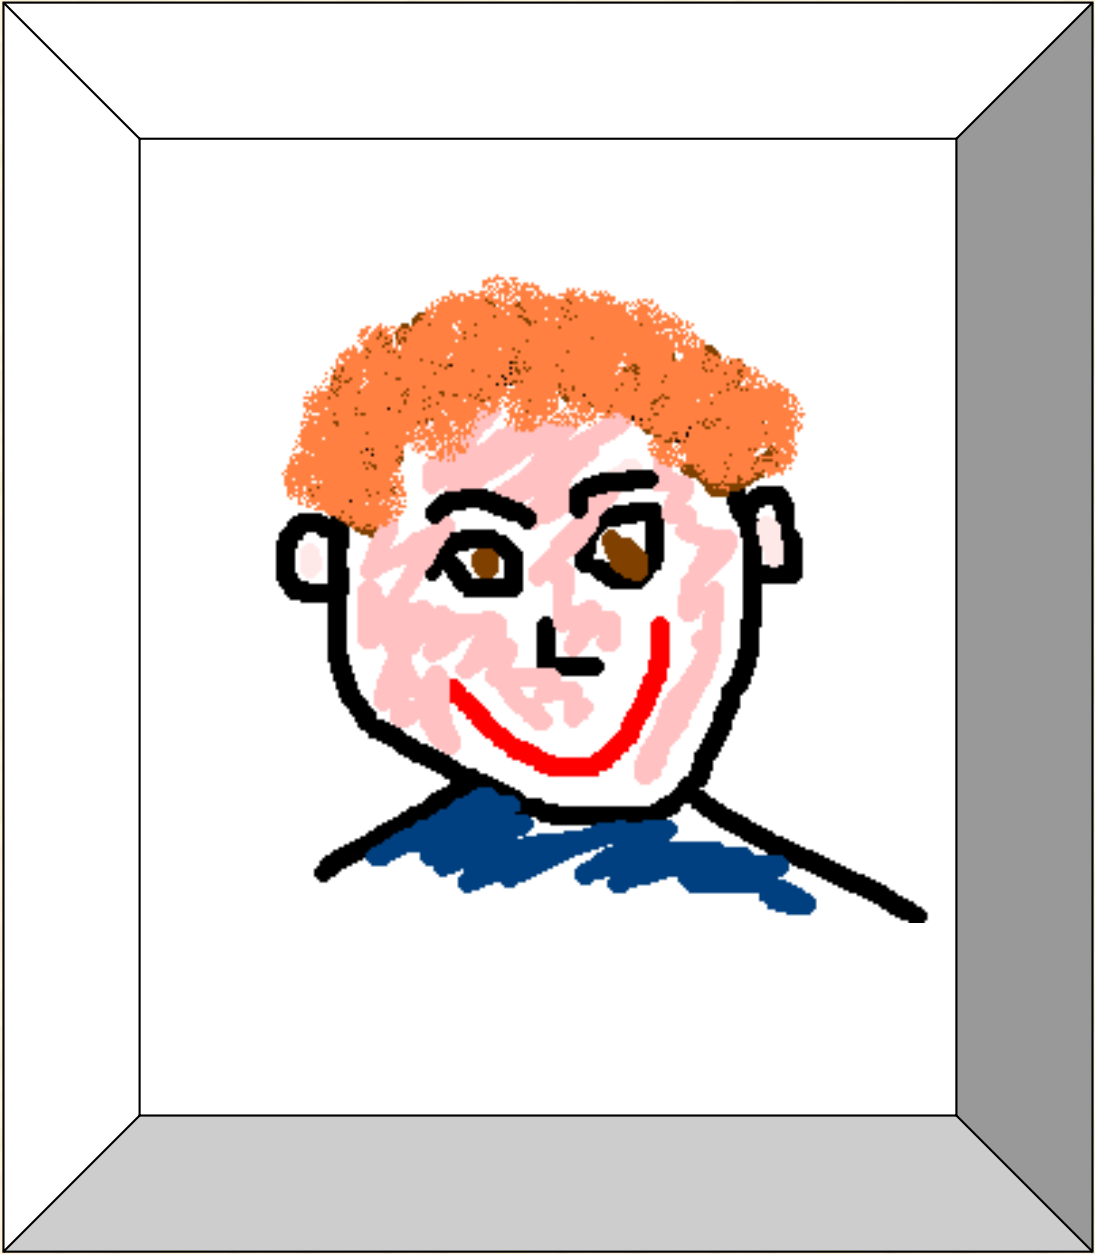

Now add skin colour and clothing.

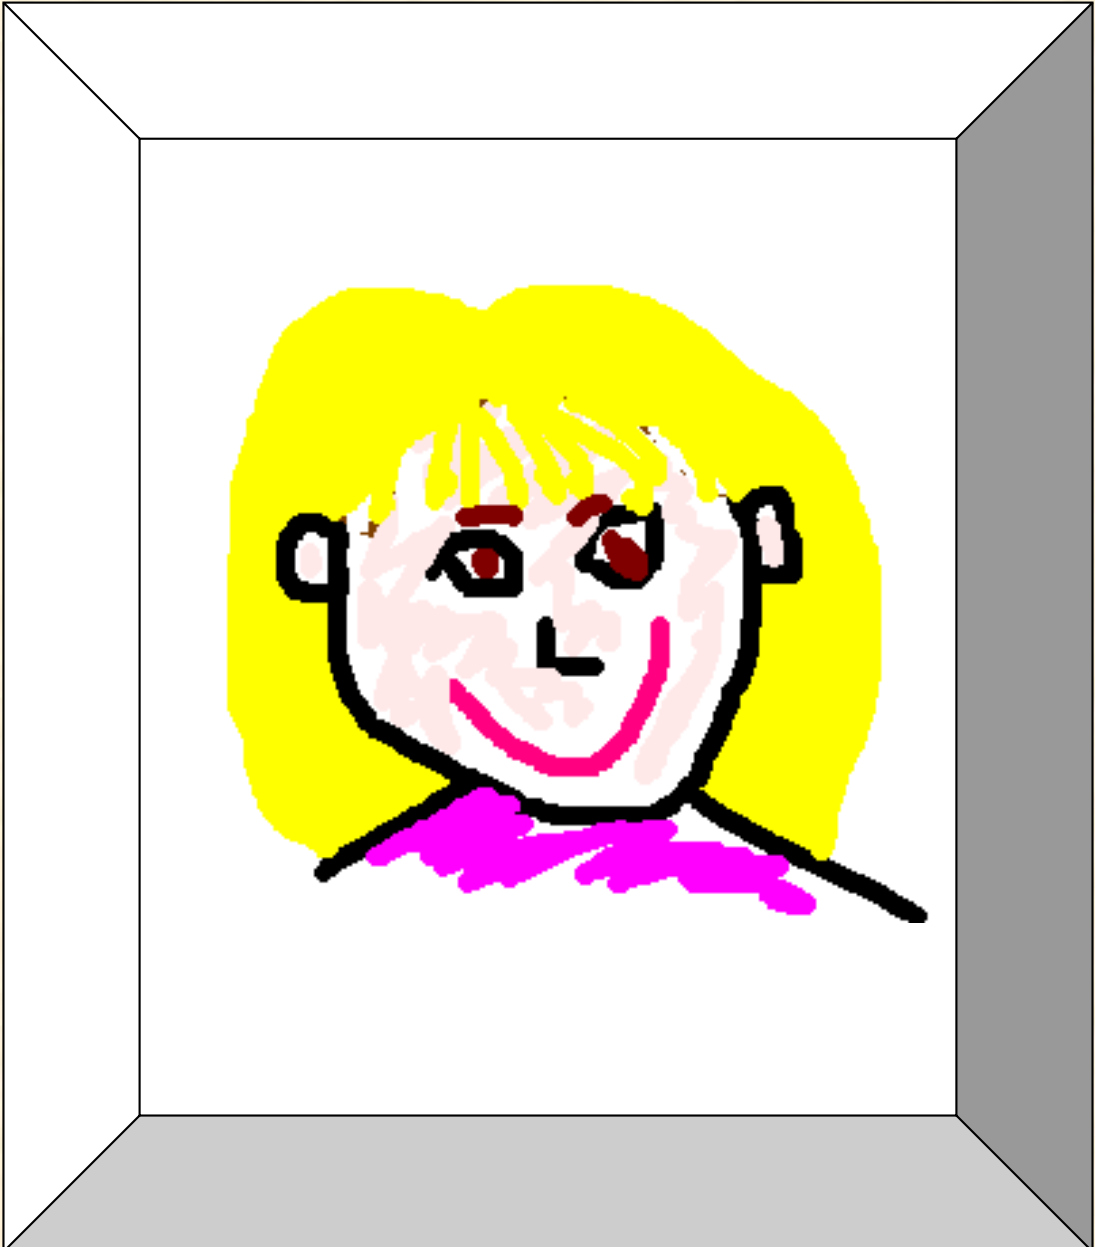

Your self portrait is finished!

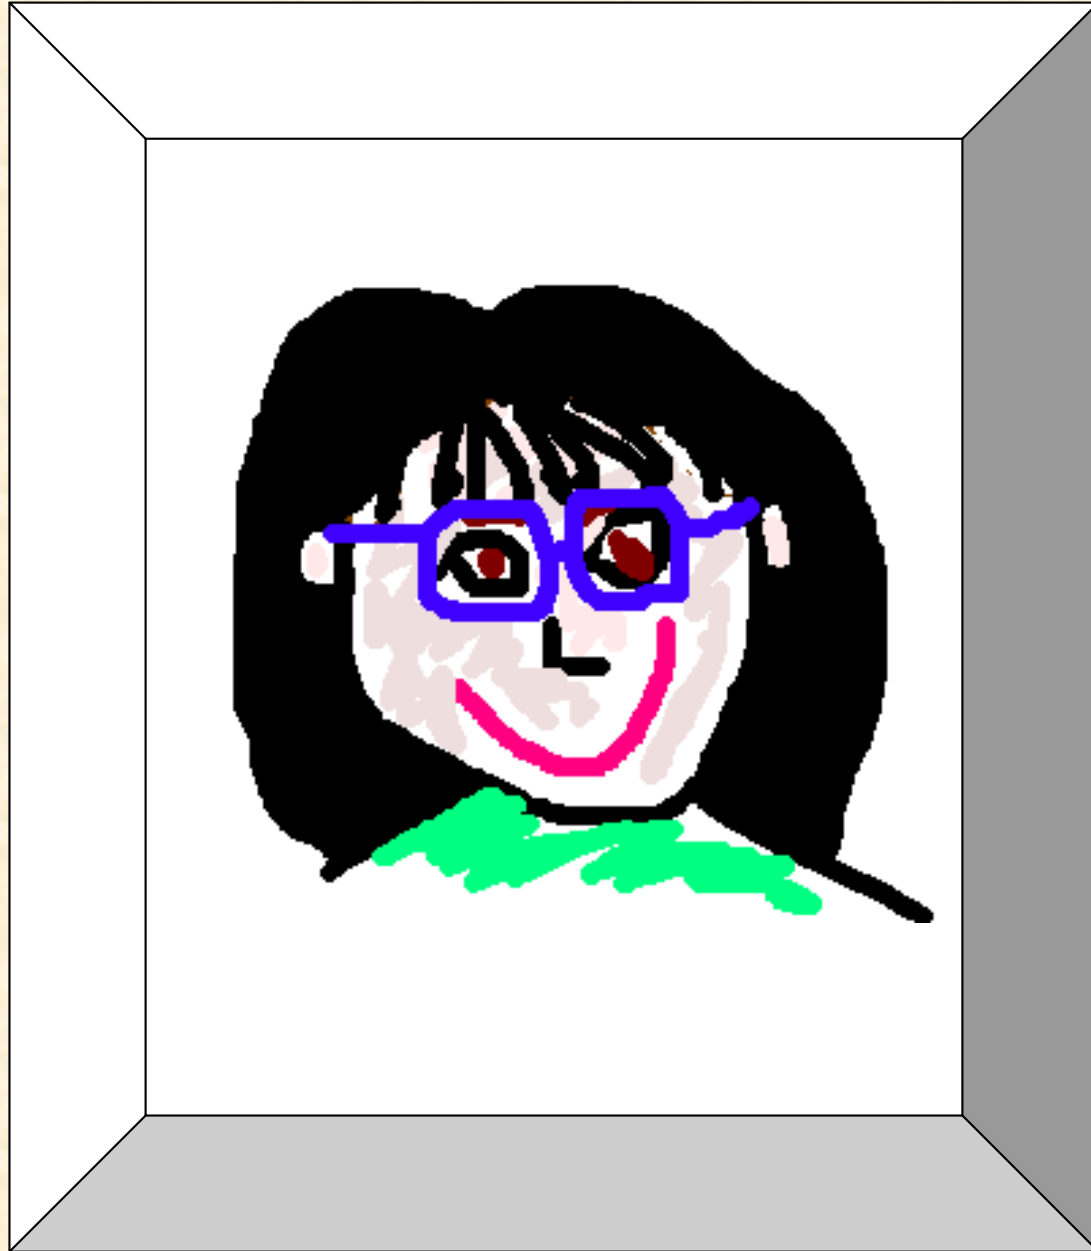

You do it the same way no matter what you look like.

You do it the same way no matter what you look like.

You do it the same way no matter what you look like.

You do it the same way no matter what you look like.
